While it is equipped with a container to empty dirt easily, and a guarantee of a full year limited if purchased new. you may encounter problems from time to time. If you do not start on turning, unable to collect, or it becomes difficult to push, it usually only takes a few small adjustments to get the vacuum back in working order. If the vacuum Wona t on, there's probably a problem with its power source. Make sure that the power cord is plugged into a working outlet. If the vacuum still doesná t e race, examine the homea e s the fuse box or circuit breaker. Replace a blown fuse or reset the circuit breaker, if necessary. If the CleanView II Wona t start and not V'a no problem with the fuse box or switch, examine the same unplug the power cord for damage such as a nick or exposed wires, and the Bissell contact if it is damaged. When your Bissell Cleanview II can not collect dirt, there are several possible problems. In the first place to control the rotating brush Powerfoot / floor to make sure that its height is correct adjustment. It should be at the lowest level for bare floors; the setting for the short and medium-pile carpets media; and the most high setting for plush carpet hair. Check the water container at the front of the unit. The vacuum Wona t collect dirt if the container is full. It also may be able to collect debris if the tube is not connected to the suction mouth. To ensure a perfect adherence grabbing the rapid flow handle on the left side of the vacuum wand and firmly pushing the tube into the suction opening. If the tube is in place properly, inspect it for cracks and holes, and replace it if necessary. Your Cleanview II can not collect dirt if there is a clog in the vacuum. Disconnect the appliance, empty the dirt container and examine the upper reservoir and slits; the torque tube-and-click; the suction mouth; hose; hand pipe; and foot tube for any debris that can cause a clog. If one observes the dirt escape as empty, the collection bucket can be installed incorrectly. Remove it and reinsert it to make sure it is firmly in place. Dirt can escape from the vacuum if the container is full. If the dirt container is in place and empty but still dirt escapes, there may be a problem with the filters. Make sure that the circular internal and external filters to the bottom of the container, and the pre-motor and post-motor on the side of the filter filters are in place and clean of debris. When you have trouble pushing Your vacuum, height adjustment cannot be set correctly. For example, if youÄ e suction of a plush stack carpet and the powerfoot is set to the lower height value, it will be extremely difficult to push the household appliance. Rotate the knob to the front of the VacuumÄ e s base to the correct setting for youÄ e cleaning surface. You may have Pressing the vacuum if the brush cover is incorrectly installed. Verify that all four screws are in the cover position on standard models or all three stops are fixed on clean-path models. 1 upper handle Assy-Black obsolete - not available Ä e ä, ~ 0,00 Part number: B-203-1078 Not available for retail sale Not available for retail Ä e e 0,00 not Available for retail 1 upper handle ASSY-RED METALLIC Obsolete - Not available Ä e ä, ~ 0,00 Part Number: B-203-2060 Not available for retail sale Not available for retail Ä e Ä , ~ 0,00 Not available for retail 1 Upper handle ASY-PORSCHE Obsolete red - Not available Ä e ä, ~ 0,00 Part number: B-203-2143 Not available for retail sale Not available for Retail is Ä e ä, ~ 0,00 Not available for retail 2 Obsolete tube hook - Not available Ä e \$ 2.30 Part number: B-203-1028 Discontinued 3 Cyclone ASSY Obsolete - Not available Ä e \$ 5.71 Part Number: B-203-1180 Discontinued 4 Shower Obsolete Cup - Not available Ä e \$ 13.96 Part number: B-203-1250 Question 5 Foam filter Ä e \$ 8.14 Part number: B-203-8161 Backerorder: No ETA 6 Pleated circular filter Ä e \$ 10.38 Part number: B-203-1464 Available, 5 available Ä e \$ 10.38 In Stock, 5 Available 7 Filter Cup Ä e \$ 10.63 PAR T Number: B-203-1182 Backerorder: No ETA lever filter 8 Ä e \$ 3.29 Part number: B-203-1215 In stock , 7 available Ä e ä, ~ 3.29 In stock, 7 Available 9 Block N Seal Obsolete - Not available Ä e \$ 3.42 Part number: B-203-1190 SEDVED 10 Obsolete casing cable - Not available Ä e \$ 3.06 Part number: B-203-1198 Distructured 11 Obsolete power cable - Not available Ä e \$ 26.36 Part number: B-203-1067 Rocker switch interrupted from 12 ä, ~ 7.50 Part number: B -203-1035 Shipping in 6 - 10 working days Ships in ä e
